

THE **POWER** YOU FEEL

Braille Lithium Batteries are all designed and manufactured in the United States of America. Braille is a globally recognised market leader in providing the best starting solutions for all aspects of the Motorsport and Tuning markets for over 20-years.

The company name, Braille, reflects the concept that the advantages of weight reduction in racing are sometimes only felt, not seen. As an industry leader, we believe our strength lies in our cranking amps. We offer more performance at your fingertips than any other battery supplier in the market. Introducing the 'New' XCEL-Lite range, offers a wide range of capacities and options, with solutions for all Motorsport and Tuning starter requirements.

Braille Battery have a very proud history, with championship wins in F1, Nascar, IndyCar, Le Mans, DTM, World Rallycross and WRC to name a few. We also pride ourselves in being the preferred battery supplier to high profile race car manufacturers globally.

LONG LASTING

Lasts 3-5x longer than traditional lead acid batteries

LIGHTWEIGHT

Offers significant weight savings over traditional lead acid batteries

QUICK START

Superior starting capabilities with high cranking amps

OUTSTANDING PEDIGREE

Over a decade of use in street and race vehicles

GREAT FOR STORAGE

They self-discharge less than 1% per month

RELIABILITY

Engineered for reliability and low failure rate

PERFORMANCE

Lithium technology lets you use up to 100% of rated capacity

SMART DESIGN

Made with original Equipment Replacement Manufacture (OEM) sizing for an easy switch to lithium
