# EB150

PORTABLE POWER GENERATOR

# EB150

POWERFUL FOR RECREATIONAL PURPOSES

The LP Energy EB150 is a powerful portable power generator and delivers the same voltage and quality as the main power supply. Thanks to the EB150, almost all electrical devices up to 1000 W can be supplied with power without any problems.

Thanks to the battery of this generator (1500 Wh) a laptop can be charged approx. 25 times, a small fridge can run for up to approx. 36 hours and you can go up to approx. 54 hours when it comes to watching TV. You can charge a smartphone battery no less than 180 times. You can charge the generator via main power, your car or with 16 V to 60 V solar panels. Thanks to the integrated MPPT, the generator is also effectively charged via the sun in slightly cloudy weather.

With the supplied MC4 cable, the generator can be connected to almost any MC4 solar panel. The LP Energy power generator is a high-quality product and is generally used for recreational purposes. This generator has been specially designed for powerful devices such as a drill, hair dryer, small fridge, TV and as a charger for various accessories. The generator is supplied with a charger for plugging into your wall socket, a car charger and a MC4 charging cable for solar panels. There is also a manual with a warranty card and qualification certificate.
