

USER'S MANUAL

"IMPORTANT SAFETY INSTRUCTIONS-SAVE THESE INSTRUCTIONS"

"DANGER-TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK,
CAREFULLY FOLLOW THESE INSTRUCTIONS"

- (1) The lithium battery charger is used only for the original rechargeable battery.
- (2) The lithium battery charger is used indoor and in dry locations
- (3) The socket-outlet shall be installed near the equipment and shall be easily accessible
- (4) The lithium battery charger is not to be repaired and not to be used any longer If it is damaged or defective
- (5) If the lithium battery charger is damaged or does not charge anymore, please Return the charger to the store where you purchased it. Do not dispose it into the household garbage
- (6) The lithium battery charger is intended to be correctly orientated in a Horizontal or floor mount position
- (7) The charger intended for use with a detachable power supply cord that is to be used for connection to the normal household voltage. The power unit is capable of operating at different input voltages without user adjustment
- (8) How to use this charge
 1. Properly connect the charging ports of charger and battery completely. (in case of damage of the ports structure because of improperly big force)
 2. Insert the power plug of charger into AC socket, there the red LED lights, charger enters into charging status. (if the power plug inserted into the AC socket without battery connecting with charger, the green LED will light, which means it's in normal stand-by status.)
 3. The LED light turns to green when the battery is fully charged, when it comes to end of charging, pull out the power plug of charger, then remove the battery.
