

DEEP CYCLE

BATTERIES

LP Deep Cycle batteries are ideally suited for applications that repeatedly and extensively discharge and charge. The extremely high cycle stability results in a longer lifespan, and the robust design makes it resistant to deep discharges of up to 100%. This makes it the ultimate choice for industrial applications as well as recreational vehicles.

The extensive range of LP Deep Cycle is available in various battery technologies, including Flooded, AGM, and Tubular. With this wide selection, there is always a battery that meets the specific energy needs and applications.

FEATURES

- LONG LIFESPAN
- DEEP DISCHARGE
- EXTENSIVE SELECTION

APPLICATIONS

- AERIAL WORK PLATFORMS
- LOGISTICS
- TRANSPORT
- CLEANING MACHINES
- RECREATIONAL VEHICLES
- GOLF CARTS
- UTILITY VEHICLES
- MARITIME
- SOLAR-ENERGY

power on command

FLOODED

The LP Deep Cycle Flooded batteries offer a proven history of robustness and durability. In addition to being long-lasting, they are the most affordable and recyclable option for providing power to golf carts, industrial machines & equipment, and marine & recreational vehicles. With proper maintenance, the LP Deep Cycle Flooded batteries offer a long lifespan and high performance.

MODELS & SPECIFICATIONS

Artikel number	Nominal voltage (V)	Length (mm)	Width (mm)	Height (mm)	Total height (mm)	Capacity (Ah/20hr)	Capacity (Ah/5hr)	Lay-out	Terminal
DC LP 105	6	260	180	248	279,5	225	185		UTL
DC LP 125	6	260	180	248	279,5	240	195		UTL
DC LP L16	6	296	176	402	425	420	344		DUAL
DC LP 1275	12	328	180	248	279,5	150	120		UTL

AGM

Designed with an Absorbent Glass Mat separator to hold the electrolyte, AGM batteries offer a maintenance-free solution with an impressive cycle life. Additionally, the built-in vibration-resistant and maintenance-free operation with valve regulation (VRLA) provides an extra layer of reliability.

MODELS & SPECIFICATIONS

Artikel number	Nominal voltage (V)	Length (mm)	Width (mm)	Height (mm)	Total height (mm)	Capacity (Ah/20hr)	Capacity (Ah/5hr)	Lay-out	Terminal
DC GF6210	6	260	180	252	274	210	185		DUAL
DC DTA6245	6	243	187,5	275	275	245	221		T11

TUBULAR

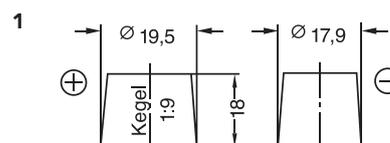

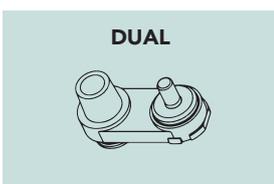

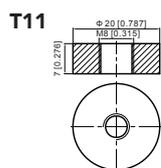

With advanced tubular positive plates, these batteries offer unparalleled lifespan and performance under severe conditions. The construction of these batteries is ideally suited for heavy industrial applications due to their remarkably long lifespan.

MODELS & SPECIFICATIONS

Artikel number	Nominal voltage (V)	Length (mm)	Width (mm)	Height (mm)	Total height (mm)	Capacity (Ah/20hr)	Capacity (Ah/5hr)	Lay-out	Terminal

MAINTENANCE & CHARGING

The CBHF2 15-30 is an advanced high-frequency battery charger, specially designed for deep-cycle batteries. Suitable for batteries with a voltage ranging from 12V to 40V. With an output current of 15A to 30A, this charger is ideal for efficiently and safely charging a wide range of applications.

ABOUT LANDPORT

Landport Batteries, founded in 1993, is a trading company with more than 30 years in the import and distribution of batteries. We sell 1.500.000 batteries annually. Since 2002, Landport Batteries is part of Louwman Group which is one of the largest automotive distributors in Europe and also active in the mobility aids industry. We operate reliably and successfully in more than 35 countries throughout Europe.

OUR SERVICES

We serve our customers from our office and central warehouse in Raamsdonksveer in the Netherlands. After 30 years, we can offer you a lot more than just batteries:

- Short delivery times
- 350.000+ batteries in top condition
- Excellent customer service due to international sales team (5 languages)
- Private label possibilities
- REACH and CLP compliant
- Safety data sheets (SDS) available in 24 languages
- Certified member of DVSE-Topmotive (online parts catalogs)

With a rich history of excellence and a continuous focus on innovation, loyal partnerships and customer satisfaction, Landport Batteries continues to lead the European battery market. Discover for yourself why so many customers choose the power and reliability of Landport Batteries.
