

Braille **XC18.0-H** Motorsport Lithium Battery

At only 2.8 KG, the XC30.0-H Motorsport Lithium Battery is a high-performance upgrade from a traditional lead acid battery. Offering significant weight reduction, more power output and lasting up to 5 times longer than lead acid batteries!

BENEFITS:

- Superior starting capabilities with high cranking amp output per kg
- Fast and efficient recharge, up to 5 times faster than lead acid batteries
- Can be used in "Total Loss" (no alternator) applications
- 3-5 times longer service life vs lead-acid batteries
- Engineered for high shock and vibration applications
- Up to 2/3 weight reduction for equivalent cranking performance

PRODUCT INFORMATION

+ Physical Specs

Battery Chemistry	LFP
Length (mm)	177.8
Width (mm)	76.2
Height (mm)	158.7
Weight (kg)	2.8
Terminal Type	Brass terminal block with M6 bolt
Polarity	Right +

+ Technical Specs

5 Second Pulse Cranking Amps	752	Charging Temperature	0C to 50C
10 Second Pulse Discharge Current (A)	600	Discharge Temperature Range	-20C to +60C
Voltage (V)	12.8	Storage Temperature	-20C to +60C
Capacity (Ah)	30.0		
Capacity (Wh)	384		
Continuous Discharge Current (A)	300		

+ Charging

Recharge Voltage	14.4V - 14.6V
Maintenance Charge Voltage	13.8V

Rev 05-23
